

WEDDING

OH MY DAHLIAS

Wedding Flowers

Thanks for your enquiry and welcome to Oh My Dahlias.

An exciting time - congratulations!

I'm Rachel, a flower grower creating seasonal, garden inspired wedding flowers with dahlias at their heart.

My flowers are thoughtfully grown, naturally styled, and designed to make your day feel truly special.

Sustainability guides every decision I make from seed to bouquet.

Growing with the seasons, minimising waste, not using chemicals or floral foam... which in turn creates designs that are kind to the planet.

I work exclusively with my own home grown flowers and those from local trusted growers.

I do not buy imported flowers hence my season is relatively short.

Oh My Dahlias is a one woman small business that becomes two for weddings and events when I'm joined by my wonderful friend and part time florist Emma.

(We do like a chat and we're full of beans)!

A vibrant bouquet of flowers is arranged in a repurposed metal milk can. The bouquet includes several large, light-colored dahlias, tall blue delphiniums, and clusters of purple flowers. The arrangement is set under a white canopy tent, with a green lawn and trees visible in the background. The text "PICK N MIX" is overlaid in large, bold, pink letters across the center of the image.

PICK N MIX

OH MY DAHLIAS

How much do wedding flowers cost?

No one likes to talk about the cost and it's a bit tricky as every wedding is bespoke and the choice of flowers can substantially vary in cost.

I grow a lot of annuals alongside my dahlias but other perennials such as peonies and roses are brought in from local growers.

It can be difficult for couples and their families to budget for something they've never had to organise or buy before and with that in mind I have created a price list for guidance below.

This is a mix and match service- perhaps you are looking solely to buy DIY buckets from me, just a bouquet or equally 100 bud vases and nothing else.

I do not have a minimum spend - my availability is what is more important and that you like my style and my flowers.....

British grown flowers, in both gentle or bold colour palettes that feel natural and unfussy rather than contrived.

The next pages lay out those options with a guideline cost.

Delivery and set up costs are based on venue distance and size of order which will be included in any requested quote.

--------------------	--	-----------

Price per bucket notes

Couple often come to me solely for dahlias.
A whole bucket of 50 plus dahlia stems is £90.
Quotes available for multiple buckets over 2.
14 days notice is imperative for 2 plus bucket orders. Please just get in touch.
Bring your own buckets or buy here for £5 each.

How many buckets do I need for a DIY wedding?

Stem Count Guide

To assist you in planning, these are guideline quantities for each of your pieces

Bridal Bouquet 30-40 stems
Bridesmaid Bouquet 20-30 stems
Small Jam Jar 10-15 stems
Large Jam Jar 15-20 stems
Vase arrangements up to 50 stems
Bud vases 3-7 stems

It's always a good idea to order a few stems more than you think you'll need to account for mistakes or to help your arrangements/ bouquets look fuller.

No one ever said 'you can have too many flowers'!

What do you need to let me know?

Now you've taken all that in - what happens next?

1. First find out if your date is available. We can then go from there.
2. Think about your chosen colour palette of which you are welcome to send me inspiration photos and examples.
Popular choices being:
 - Shades of one colour
 - Soft pastels
 - Bright and bold
 - Green and white/ creams.
3. Choose your flowers- be that DIY buckets, bouquets etc or a mix of both.

Once you've decided this I will then send you a quote for you to agree followed by a booking confirmation which will include details on collection, delivery and set up. I do ask for a 20% deposit on confirmation.

I'm very happy to chat to you.
